

SystAGfiles

File collaboration
while on the go!

Product Features

Share documents

Upload files directly to SharePoint and network drives.
Share document links with your colleagues.

Share email attachments

Save email attachments directly to network drives and SharePoint.

Preview & open docs

Automatically on iPads, built-in preview functionality also on BlackBerry and Android.

Upload and share images & videos

Upload images and videos from your mobile device.

Real-time updates

Receive real-time updates of SharePoint and network documents. Define important files as offline files that are kept up-to-date.

Find documents

Find documents by performing a search.

Simple navigation

Mark files and folders as favorites. See recently visited files and add files to offline files (next release) to work with them instantly.

Look & Feel

User can define shares, sites, favorites by themselves.

Offline documents

Define documents which are always synchronized – to work offline with them.

SharePoint features

Get contact information, latest editor or check your SharePoint calendar/lists etc.

Multiple attachments

Send multiple files (SharePoint & network) with one email, as links or attachments.

Printing

Easily print on network or Bluetooth printers.

Edit docs on the go

Create, edit or delete files on your mobile device and save them directly to SharePoint or network drives.

Smart collaboration

Get your colleagues contact information via their SharePoint profile.

Share sites & favorites

Your sites and favorites are automatically transferred to all your mobile devices.
